

## **BtL** Mobile Services

### Overview

**BtL** can manage all your mobile needs to ensure you are getting the best value for money, even if you want different networks for different parts of your business. Through simple analysis of your bills we will assess your individual profile – this way we can source the most competitive call rates and select the right network that works for you. **BtL**'s one bill service provides optional site by site breakdown of all services allowing simple allocation of costs.

We continually save money for businesses of all sizes by reorganising their mobile communications. We stay in regular contact with all of our customers to ensure you are getting the best possible service. **BtL** liaise directly with the network on your behalf which means we can get any issues or queries dealt with quickly and efficiently.

Because we are an independent i.e. not tied to a specific network, we look for the best deal for the way you use your Mobile Communications.

### Commissions

There is a healthy commission available should you choose **BtL** for your Mobile Communications.

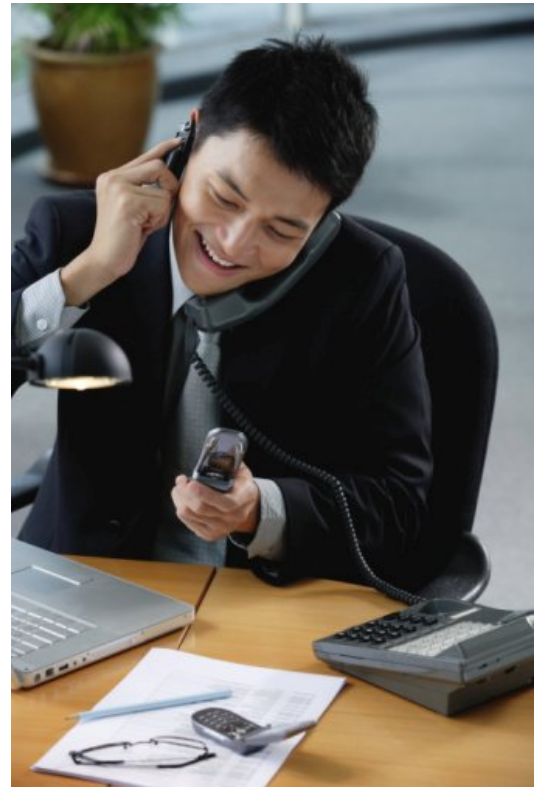

70% of the commission is passed directly back to you, this can be used for new handsets, lost, damaged or stolen replacement handsets. **BtL** retain 30% of the commission for brokerage fees and to cover the costs of ongoing handset support calls and management of new or replacement hardware.

New handsets will be charged at **BtL** wholesale cost plus 10%. To confirm pricing we require a definitive specification. This is due to the continual changes in the available handset models on the market.

### Push Email Service

You can take your Exchange email, calendars, tasks and contacts everywhere you go. Push email synchronises windows mobile devices with Exchange. Data is pushed to your mobile device in real time, so the latest information is always with you, wherever you are.

- Emails are pushed directly to your mobile device, the moment they arrive in your mailbox.
- 100% push synchronisation with your mobile, no desktop software required.
- Data push occurs only when an event happens, no constant synching needed.
- Access your email, Calendar, Contacts & Tasks.
- Push email does not require a separate server, therefore is cheaper to implement and easier manage compared to BlackBerry.

## Exchange with BlackBerry

With BlackBerry you can stay on top of your work on the move with real time access to your emails. Proactively pick and up act upon your mail, contacts or calendar wherever you are.

All Outlook data (calendar, address book, sent and received emails) is automatically synchronised over the air to create the ultimate business call. The ability to access your business email and data from anywhere, have all the features of an Exchange Server for a fraction of the cost.

- Send and receive new emails in real-time
- Synchronise sent and received e-mails with Outlook
- Sent items appear in BlackBerry and Outlook automatically
- Synchronise BlackBerry address book with your address book
- Synchronise BlackBerry calendar with Outlook calendar
- Synchronise BlackBerry task list with Outlook tasks
- Manage and distribute custom BlackBerry applications
- Control end-user phone features remotely

Whether you are a small, medium or large business, **BtL** has the mobile solution for you.
